

I do not want telemarketeers calling my "unlisted, private" number selling me items I don't need or more importantly do not want. The consumers' right are not taken into consideration. I pay additionally for my telephone number to be unlisted, extra for caller ID to avoid those calls, and another feature called call intercept to view those telemarketeers' telephone number. And I occasionally get calls, not as much as before. Unless your paying my telephone bill, I suggest you mind your own business and leave NJ alone!!
